

Vuong Nguyen Trung

SOFTWARE TESTER (MANUAL)

Dob: 24/01/2002

Gender: Male

Phone: 0358570211

Email: trungvn.tester@gmail.com

Address: District 12, HCMC

OBJECTIVE

Possessing nearly two years of experience in software testing, I have honed my attention to detail, quick learning ability, and effective problem-solving skills. I thrive in high-pressure environments, consistently delivering high-quality results. With my expertise, passion, and the support of the company, I am confident in my ability to successfully tackle and excel in any assigned tasks.

EDUCATION

09/2020 - 12/2022

FPT POLYTECHNIC COLLEGE

Software Application

GPA: 3.3/4.

· President of the Tester Club at the university.

WORK EXPERIENCE

09/2022 - 07/2024

SUNSHINE SOFTWARE SOLUTION Co., Ltd

Software Quality Control | Business Analyst (Full time)

- Involving in over 15 projects of varying scales, taking responsibility for quality control in 10
 projects, serving as a business analyst in 2 projects, and supporting software testing in the
 rest.
- Be responsible for analyzing requirements, creating test plans, writing test cases, executing tests, and reporting to the team leader.
- Collaborated with other teams to finalize product features and assisted in testing APIs based on the provided API list, with a focus on ensuring the accuracy and completeness of API functions.
- Providing invaluable assistance to customers in setting up test environments and offering
 expert testing guidance, while also directly engaging with customers to handle feedback and
 bug tracking.
- Fulling the role of Business Analyst in multiple projects, proactively researching business requirements, analyzing and implementing essential modules, segmenting detailed modules by client requirements, and creating meticulous wireframes. In charge of evaluating and estimating the completion time for modules.

SKILLS

Programming Languages

HTML/CSS, JS, SQL, Java, Python

Platform/Framework	Spring boot, Git, SQL Server, My SQL
Testing	Extensive experience in developing and executing comprehensive tests, including test plans, test cases, and using Postman for APIs testing to validate endpoints, ensuring data integrity, and functionally seamless integration.
Requirement Gathering & Analysis	Ability to gather and analyze business requirements through stakeholder interviews, workshops, and documentation.
Documentation & Specification Writing	Proficient in writing clear and comprehensive Software Requirements Specifications (SRS), functional specifications, and user stories.
Project Management	Proficient in project management methodologies, especially Waterfall, Scrum, and Agile, to effectively collaborate with development teams.
Personal Skills	Teamwork, adaptability, communication, problem-solving.

PROJECTS

5 Phut Thuoc Bai - Mobile Application

(01/2023 - 03/2023)

Name of customer	TAM TRI LUC TRAINING JOINT STOCK COMPANY.
Description project	5 Phut Thuoc Bai application is an application that uses brain science methods to help users learn more effectively, especially in memorizing knowledge.
Team size	10 members.
Position in project	Quality Control.
Responsibility in project	 Project analysis. Develop a test plan. Perform functional tests of the application. Detect and report errors to the development team. Suggest improvements to the application. Write instructions for use.
Technology description	Frontend: ReactJS.Backend: C#.Mobile: React Native.

Buzan Mindmap - Website Application

(03/2023 - 05/2023)

Name of customer	TAM TRI LUC TRAINING JOINT STOCK COMPANY.
Description project	Buzan Mindmap is a powerful web application that provides mind mapping features that help users organize and present ideas visually.
Team size	10 members.
Position in project	Quality Control.
Responsibility in project	 Designed and developed test cases and test scenarios based on requirements. Performed manual testing to ensure product quality. Identified, reported, and tracked defects through the testing process. Conducted integration testing and supported user acceptance testing (UAT).

Technology description	• Frontend: ReactJS.
	• Backend: C#.

Hita Wallet - Mobile Application

(05/2023 - 08/2023)

Name of customer	TAM TRI LUC TRAINING JOINT STOCK COMPANY.
Description project	Manage finances, salaries and commissions for Tam Tri Luc employees and distributors.
Team size	10 members.
Position in project	Quality Control.
Responsibility in project	 Project analysis. Develop a test plan. Perform functional tests of the application. Detect and report errors to the development team. Suggest improvements to the application. Write instructions for use.
Technology description	Backend: C#. Mobile: React Native.

Ila Career - Career Website

(07/2023 - 09/2023)

07/2020 - 03/2020)	
Name of customer	ILA VIETNAM LTD. CO.
Description project	Website recruiting English teachers for ILA VietNam.
Team size	4 members.
Position in project	Quality Control, BA
Responsibility	BA: Gathered and analyzed client requirements to create business requirement documents (BRD) and system requirement specifications (SRS). Communicated requirements to the development team and ensured accurate implementation. Coordinated with stakeholders to address and resolve issues during the project lifecycle. Quality Control: Designed and developed test cases and test scenarios based on requirements. Performed manual testing to ensure product quality. Identified, reported, and tracked defects through the testing process. Conducted integration testing and supported user acceptance testing (UAT).
Technology description	Frontend: WordPress.Backend: PHP.

ZiiP Bus - Mobile Application

(09/2023 - 12/2023)

Name of customer	TAM TRI LUC TRAINING JOINT STOCK COMPANY.
Description project	ZiiP Bus is a mobile application to manage school buses. Using biometrics, NFC for attendance. Drivers track the map on the application of student pick-up and drop-off points.

Team size	4 members.
Position in project	Quality Control
Responsibility in project	 Designed and developed test cases and test scenarios based on requirements. Performed manual and/or automated testing to ensure product quality. Tested APIs using tools such as Postman, JMeter, validating request/response data, status codes, and error handling. Executed database testing on SQL Server to validate data accuracy, integrity, and consistency. Wrote and executed SQL queries to verify business logic, check data migration, and validate reports. Identified, reported, and tracked defects through the testing process. Conducted integration testing and supported user acceptance testing (UAT).
Technology stack	Frontend: ReacJS. Backend: Java.

MatBao MBE - Mobile Application

(03/2024 - 05/2024)

Name of customer	MAT BAO WS JOINT STOCK COMPANY
Description project	A smart event management solution utilizing advanced AI and QR code technology for facial recognition-based check-ins.
Team size	10 members.
Position in project	Quality Control, Business Analyst (BA)
Responsibility in project	 BA: Gathered and analyzed client requirements to create business requirement documents (BRD) and system requirement specifications (SRS). Communicated requirements to the development team and ensured accurate implementation. Coordinated with stakeholders to address and resolve issues during the project lifecycle. Quality Control: Designed and developed test cases and test scenarios based on requirements. Performed manual testing to ensure product quality. Identified, reported, and tracked defects through the testing process. Conducted integration testing and supported user acceptance testing (UAT).
Technology stack	Frontend: Flutter. Backend: C#.
